TRANQUIL

Single cloud business solution
to manage core key business operations,
with real-time data, easy-to-use and role-specific business information.

TRANQUIL ERP Software provides industry-specific business software designed around the needs of manufacturing, distribution, retail, and services organizations. More than 12 years of experience with our customers' unique business processes and operational requirements are built into every solution - in the cloud or on-premises.

Anytime, anywhere access

Provide 24/7 system access from any location on any device. Content automatically reflows to respond to various screen sizes, orientations, and resolutions.

Flexible configuration options

Support multiple configuration options to match the way you do business, including single- or multi-tenancy, multiple business entities, and cloud or on-premises deployments.

Data and platform security

Keep sensitive company data secure by limiting user access. Define user access policies, control access policies according to user, and manage encoding of sensitive data.
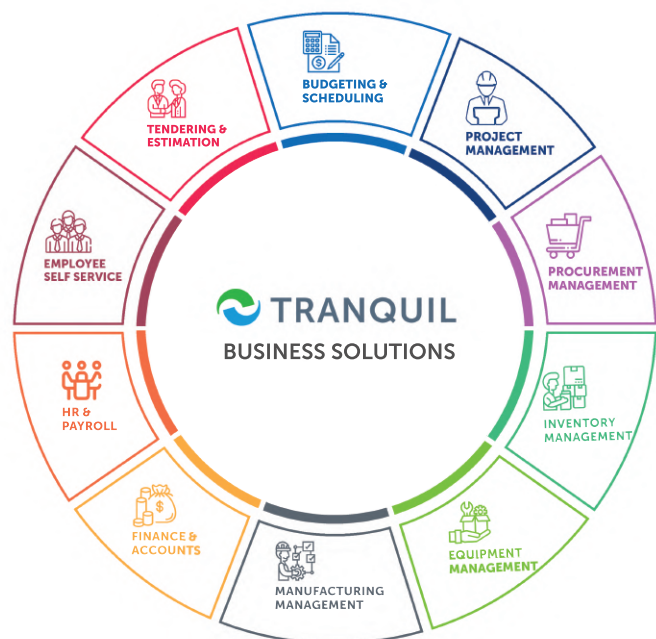

Localization and international support

Support multiple languages and currencies for companies with offices in various countries. Full compliance with GCC laws & Zatca regulations.

Customer Support like you never experienced before. Free unlimited chat/call support in both Arabic / English language.

PRODUCTION

Cost-effective production is possible.

Advanced make-to-orders, Product to orders, Assemble Order, and other tools you need to maximize efficiency in your production process. Whether you have simple or more complex manufacturing needs, Tranquil Production management is a great solution for you.

With the right data at your fingertips and powerful bill of materials software, cost-effective production is possible.

Tranquil Production is an ideal inventory solution for many types of manufacturers. It allows you to create Make-to-order Production for a variety of tasks. You can also group multiple production orders into overarching manufacture orders, add step-by-step instructions, categorize, prioritize, and schedule work orders, and attach pictures, documents, and notes to them.

Gain the flexibility you need to manage production in make-to-stock, make-to-order, engineer-to-order, configure-to-order, project-centric, job shop, batch, & repetitive manufacturing environments.

PAYROLL MANAGEMENT

A payroll system that adheres to best practices can bring you significant dividends. Stop juggling between confusing excel sheets. Automate your payroll for hassle-free / stress-free month ends and salaries on time. Additionally, get 100% statutory compliance without lifting your finger.

LABOR & JOB TRACKING

Tranquil Time is a cloud-based time-keeping solution for tracking employees' hours, overtime, vacation time, payroll, labor on job orders, available hours for production, and more.

A combination of Tranquil Time and Project / Production gives you accurate records of labor costs for job orders and other projects.

GEOFENCING ATTENDANCE

A sophisticated time management system with geofencing capability helps track employee attendance in real-time. This feature allows an administrator to set geographical areas to limit where an employee is permitted to clock-in and clock-out.

EMPLOYEE SELF SERVICE (WEB/MOBILE)

Watch trust and motivation levels go up when employees gain access to the employee portal and have online access to their payroll and other information.

There are endless rewards to reap - better communication, standardized processes, faster turnaround times, transparency, engagement and superior quality. What's more, we have a nifty mobile app for the ESS portal for anytime, anywhere access.

FINANCE & ACCOUNTING MANAGEMENT

Gain Absolute Financial Control. Time Cost. Boost Revenues.

Powerful business finance software, simple enough for small shops & comprehensive enough for complex multi-nationals. That can support your needs today & in the future.

The right chart of accounts makes a big difference for your organization. It helps you classify your transactions correctly, and generate meaningful reports to help you run your business better.

With full support for VAT calculation, now Tranquil automatically generate VAT return in one click and keeps track of how much tax received/owe.

TRANQUIL

From reporting and analytics, to insight and decision-making, gain a more complete picture of your business on-demand and in real-time.

A PLATFORM BUILT FOR GROWTH
Technology & Security

The TRANQUIL platform is a versatile architectural framework that can be easily customized to the way customers do business. The platform uses standard web technologies and development languages, so business logic can be created or modified using the platform tools or a separate integrated development environment.

True Cloud

Access information at any time, and from anywhere, leveraging our true cloudbased software solution. Use any device, Mac and/or PC and run your operations on any browser.

Multi-Level Data Security

All communication between you and server is secured using SSL 256-bit encryption. Data is accessed using isolation techniques through n-tier architecture, so the data layer cannot be directly accessed by the user layer.

Why Microsoft Azure

Enterprises across the globe are realizing great success with business solutions powered by Cloud. They are redefining the way they do business with scalable & secure cloud-enabled enterprise applications. Globally, 90% of Fortune 500 companies are using Microsoft Azure to drive their business.

Security Development Lifecycle (SDL) is an industry leading security process on which Azure has been designed. It comprises security at its core and private data & services stay safe and secure on Azure Cloud. Also, it is the first to embrace the new international standard for Cloud privacy, ISO 27018. Thus, Microsoft guarantees the best in terms of safety for all operations and data on the Azure Cloud.
